

Agriculture in the United States

NATHAN the Judge: This way of life can be protected as the salt of the earth unending. The taxation is a great part of this. As the farmers have been in the last several hundred years in the United States, been moved off their land through the taxes they must pay in cash and they must pay the bank for in the tractor payments.

This class needs the regressive tax code.

That those with a good track record morally and are accountable and prove to be the honest farmer, would have tractors and gasoline at wholesale prices—subsidized. That where they need the water coming into the land, the military would dig the trenches and help them that this is where the United States goes. Not left up to them to try to find the water. It can go both ways, you help them, they will work with supplying the military intelligence to you.

They must prove their allegiance to the United States. So it cannot be a place for the alcoholics to beat their children in private.

STEVEN ECKL: The taxation topic will be on agriculture and farming.

Whether you have a golden age economy or if you have the economy of 100 years from now where electricity is mostly gone, the backbone of the economy is still agriculture.

Mandarin: Even if there be another Noah's flood, there must be always in abundance without scarcity or fear, that there always be the farmer to provide food for everyone.

**Luther Burbank Gardens
California**

ANDREA SELESTOW: This has not always been the case for the farmer historically. There were the armed robbers that could come through and unless you had a Robin Hood, you were at the mercy of these thieves.

STEVEN ECKL: The farmers fare no less with the cooperative farming. While it is said that 2% of the economy is farming, this is not what must be looked at. It will still remain 2% perhaps

As you can see, Nostredame has warned of how the topsoil has not only eroded but has been made useless as Nostredame has shown you where the farming is now. And it is for this push of the cooperative farming to produce in fields after fields without stopping to rest the soil.

LUTHER BURBANK Ascended: It is a farming that is without crop rotation, robbing the food of nutrients, to be side-stepping real steps in farming that has come to the point of no return. You are required to be growing the ground cover crop, to allow for the worms to aerate the soil and invigorate it with minerals.

ANDREA SELESTOW: The farmers live on the land. The land is who they are. And this is say where we are approaching a golden age, such as we are entering in now with the removing of the criminal elements as in cleaning out entire burrows of organized crime gangs, that we move that much closer to a golden age.

SAINT DIANE: That does not mean that people are whole however. Whether it was on Atlantis or here in the United States, people need to live on the land to heal their minds of the patterns of ill will and coveting. The farm is the place where these will find such a healing— absent the charlatan thinking and con men of the big cities. It is where common sense is common sense and is the National Standard.

Michael Jackson: Even if you were to think of the music, you see that the banjo, the accordion, the mandolin have not changed in the hundreds of years. Whereas the cities have a distorted reality in the music that is sung or played. Rap music is evil, it will continue to take the culture down precipitously.

STEVEN ECKL: It is to find ground. The ground is where the world is whole in the plant kingdom— with both good and evil. In the presence of the nature elements is balance and grounding to heal the mind.

The move to the city was for work. The move to the farm will likewise be for work. At while it is still true that only 2% of the economy is farming, we are

referring to the GNP. And not shown in the GNP are perhaps the millions going back to farming when we are no longer interested in having 40 shampoos to choose from, we are not interested in \$5 shoes and tolerating becoming a colony of G20! These live without the TV when nature is all about them. These want to live as Nancy of Oregon who went back to live at Grants Pass.

This new tax code, then, is that which must be for this to come forth— Farming in the United States is a guaranteed right of passage to life— a guaranteed right to freedom of expression, of a people who own their plot of land and farm as their economy and well-being.

Whether they are producing for the market is not so significant, you have the cooperative farms. Their tax would be given over in cash or crops under the new tax code. There will at times, when they cannot produce for the reasons of the inclement weather. However they will live there the rest of their life in simplicity and honor, and produce when they can. The only expense in that year is to pay in taxes what crops they have a percentage of.

This is so important to me because you have to understand the Quakers, the Shakers, the Pilgrims that even Roger Williams of Rhode Island saw this as the new United States! That these people need to be in the presence of the nature kingdom not the Evil Empires to live that is to them being fish in water. These you see are these the Quakers and Shakers who then even over the 200 years of the United States, do not change in their faith in God.

Have you noticed this? They live out the seasons and they read the bible. And this economy needs to be understood as not only one of economic welfare but spiritual welfare of this nation to *survive*.

Mandarin: How did Stalin take over Russia? He took the priests of the farming communities and killed them. He took the most rich agricultural lands and created a famine. What did Mao Tse Tung do? He created a famine to take over China.

ANDREA SELESTOW: You crowd the people in the Russian cities after the Stalin purges. They become the godless vodka and dance party ones. Saying you are atheist is escapism from living as there is no plot of land any longer to have the fish out of water so to speak.

STEVEN ECKL: It is beyond then the civil rights of an American, it is a right to life on earth.

LUTHER BURBANK: This life in the nature kingdom is without boundaries. It goes without saying that in a Chosen nation, you will have the productive people and creative people come from here. In this solution if you will.

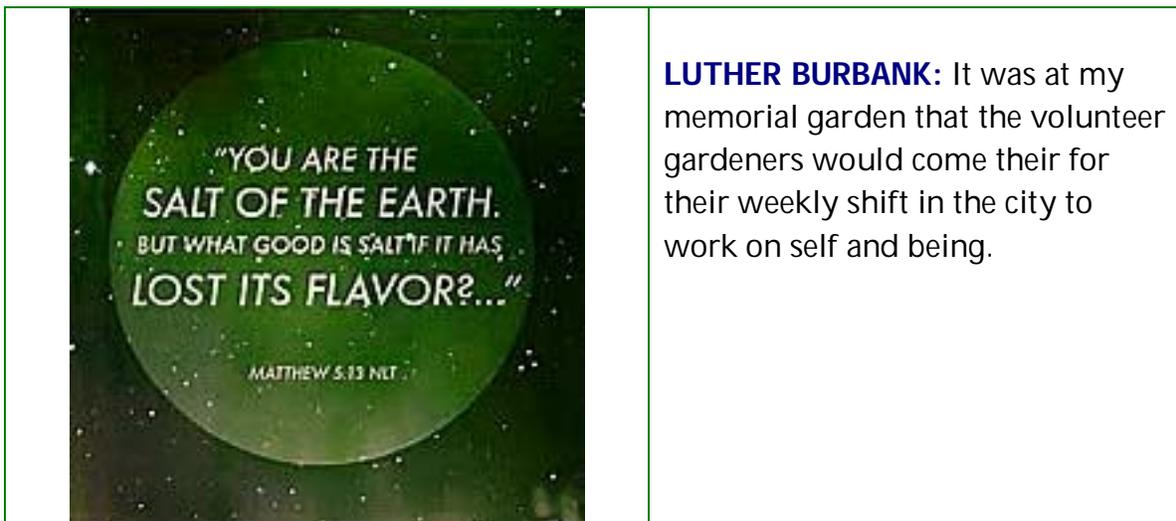

JESUS CHRIST: That this earth is a platform of evolution is for people to advance in spirituality. They are becoming good people. Where that culture can be, as the fish in water, it must be cultivated in the United States.

STEVEN ECKL: They are as the salt of the earth.

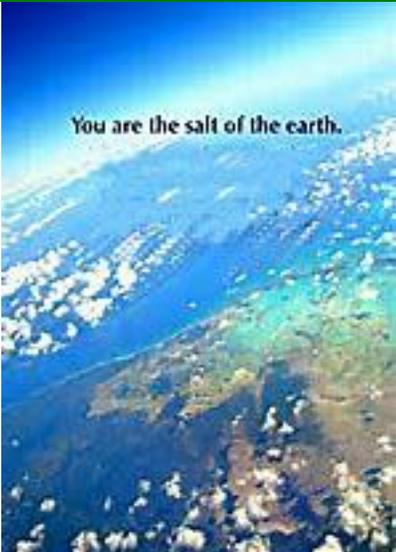

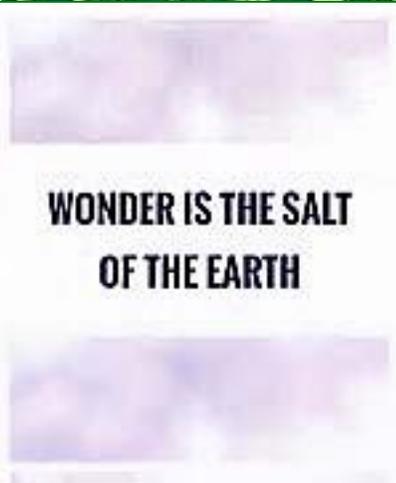

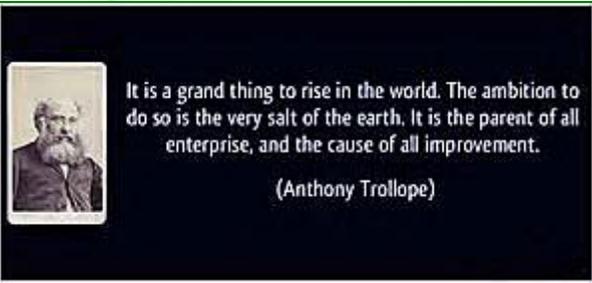

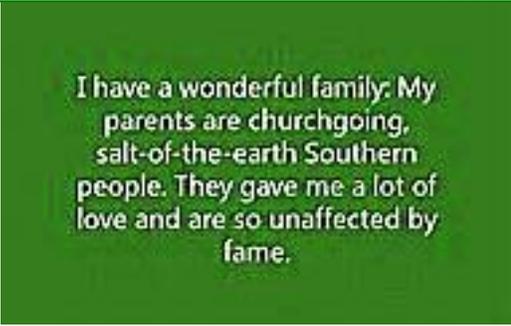

JESUS CHRIST: Where therefore these are not salt of the earth, you do not have a nation or even the plural nations. These must be given the guard training as they are the true national guard.

They would be the ones to tell you of the WMD put into tunnels, where there are gas lines placed. It is for military reasons that these are there, not only that they might find a path for their evolution in the study of the word.

We would have you look at these photos that you understand what is this class. Therefore try to see this. That where you have a military men leaving off employ, and perhaps it can even be said, that they be given a priority to know if this is where they seek to go, that after the guard training that they be given some land and tools that they might work on what is their PTSD from the military.

<p>The salt of the earth</p> <p>Meaning A very good and honest person.</p> <p>Mrs. Jones is the salt of the earth. She is the first to help anyone in trouble.</p>	<p>Nancy of Oregon: It is where there were two creeks flowing through my property that my children might learn of the largess of nature, and of life unending.</p>
<p>People who are the salt of the earth get up and go to a job that they hate.</p>	<p>STEVEN ECKL: You can see that common sense is not so common in the cities where pornography becomes a right of freedom of speech, and all media propaganda in Time Square advertisements distort the mind in a day-in and day out bombardment. Of nudity, of wrong thinking.</p>
<p><i>Solitude</i> is the salt of personhood. It brings out the authentic flavor of every experience.</p>	<p>ANDREA SELESTOW: Whereof does the soul go but to nature to find relevance in this insane society where Absolute Evil on TV and movies is idolized?</p> <p>Whereof is the salt of the earth that this nation and earth might endure, as TV has gone into foreign land even.</p>

 <p>You are the salt of the earth.</p>	<p>JESUS CHRIST: Ye are the salt of the earth if you would take up the study of scripture and holy words and works.</p>
 <p>WONDER IS THE SALT OF THE EARTH</p>	<p>JESUS CHRIST: Living in the word and works of Moses, living in the word and work of my teachings, living in the word and work of the Mother Mary teachings on healing.</p>
 <p>It is a grand thing to rise in the world. The ambition to do so is the very salt of the earth. It is the parent of all enterprise, and the cause of all improvement. (Anthony Trollope)</p>	<p>JESUS CHRIST: And to raise yourself higher, raise your children in this way of liberty, the life, light and love.</p>
 <p>I have a wonderful family: My parents are churchgoing, salt-of-the-earth Southern people. They gave me a lot of love and are so unaffected by fame.</p>	<p>ANDREA SELESTOW: There are the ways onto death. And the large cities have this everywhere you go there is not the holiness of the elements. In farming you see Absolute Evil in the common scourges.</p>

**Always Have
A Unique Character
Like SALT,
It's Presence
Is Not Felt
But
It's Absense Makes
All The Things
"TASTELESS"**

JP Morgan: You have thought I to be only as a financier. However you have not seen that I too came from this ground. So did J. Paul Getty. So did Andrew Carnegie! Even Thomas Edison. Even Henry Ford....

Well...Bill Gates had his garage. They did not come to earth with a silver spoon in their mouth either.

These few are the salt of the earth; without them, human life would become a stagnant pool. Not only is it they who introduce good things which did not before exist, it is they who keep the life in those which already existed.

J Paul Getty: I slept in my pick-up truck at the oil rigs drilling. I did not live as the sheiks in their Rolls Royce's. You cannot believe that you need the large tanks to say you are powerful, but that you have as your identity a place, a land, that is what you are accountable for. Thus, it has been said that 700 is the size of an accountable organization and now I say that land is also seeing size as accountability. Thus you know I would not be comfortable myself in a room by the ceiling-to -floor windows on the 15th floor of a Standard Oil headquarters office, as land size is also your accountability, towards humanity, that you can find yourself in, where God is secured, not to be conjectured over as it could hail tomorrow.

And you climb inside the truck and see the hailstorms— this is the life in which I would have you see as the farmer's, that as was said, was also the life of Henry Ford and Andrew Carnegie, JP Morgan.

Jesus himself, as the gospel story goes on to its dramatic conclusion, lives out the same message of the Sermon on the Mount: he is the light of the world, he is the salt of the earth, he loves his enemies and gives his life for them, he is lifted up on a hill so that the world can see.

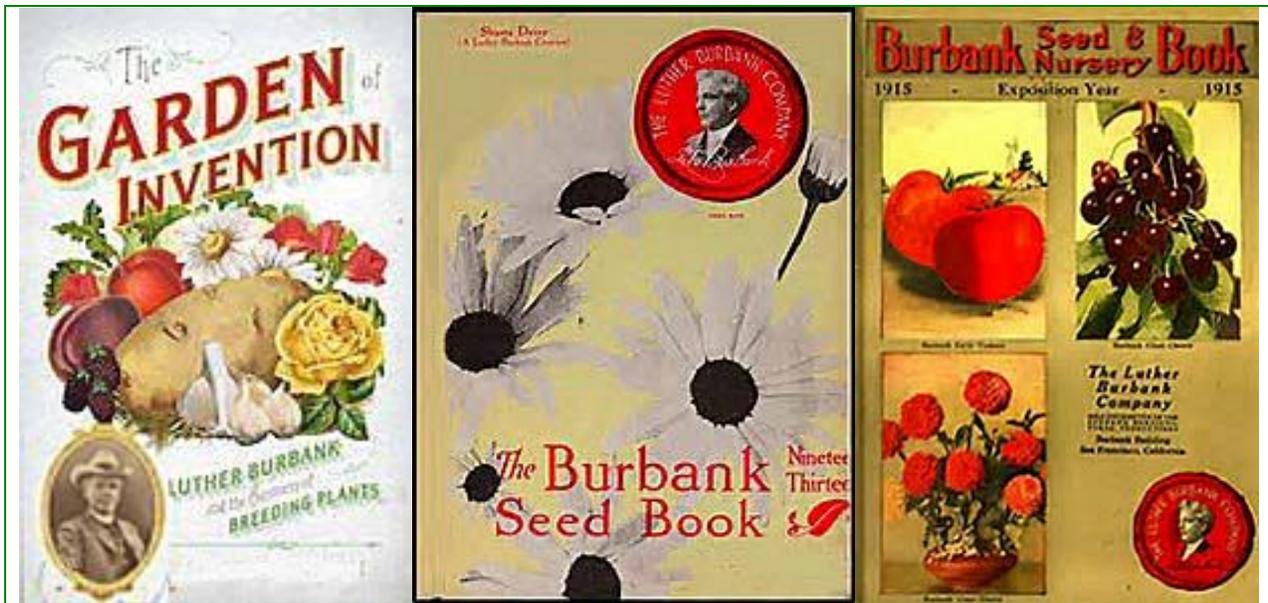

Valor White: Now you see how it is I who worked in also a high-rise building and had lost sight of the earth, and did find myself in the daily-grind of producing law and order in the legacy of J Edgar Hoover. Thus you know that without J Edgar Hoover, there would not have been the understanding of what is right and wrong, good and evil in the United States.

*"There must be something strangely sacred in salt.
It is in our tears and in the sea."*

Khalil Gibran,
Sand and Foam

GOD HELIOS: *It is a culture that you are upholding. And I charge you to make this culture happen. As past this 100 years, when the floods come, you need to have this culture in place by that time.*

LUTHER BURBANK: What I would ask you to do, is to have a blog for the farmers incoming. That they have the simplicity of the website as if they are in the 1920's when life was simple, was a moral life. And this is what they see, and not the Hollywood TV prostitute images. You can even take the graphic designs of my tomato strains, the original design of the plums and apples and see that they only see pure images of what is their life in the country.

JESUS CHRIST: Then see to the protection of this class as a culture unending.

This is not a class for economic considerations as you do now with food stamps. Although it is said here that you give land and opportunity to those who are of a responsible being, it would not be limited to a Level 5 however, only that those Level 5 are ones to administer this plan of the farmers and he sees what is to be for a high level of culture.

What you are producing is this class of farmers as the salt of the earth into the future. These must be able to survive as a culture into the next 70,000 years. They can be seen as the Quakers, the Shakers, the Pilgrims, the Baptists who as a religion ones who have sought to survive.

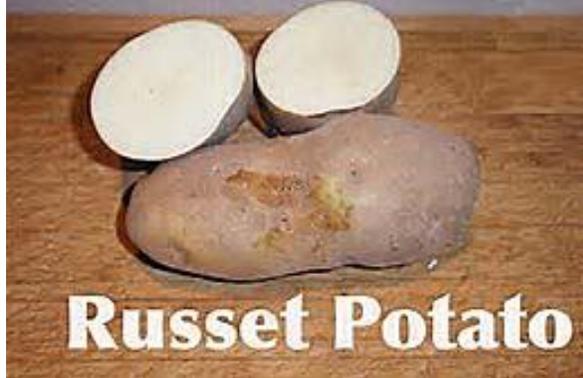

These then are taught and ipso facto will and determination to withstand the onslaught of flood or hurricane.

GOD HELIOS: It is more than economic concerns but the survival of life on earth and the United States ongoing as the Ten Commandments Religion. They would be given the teachings of Moses and Christ to preserve the Ten Commandments Religion ongoing. To keep this way of life ongoing past the 100 years. For that has been so defined for them, what is it to survive in hurricane or titanic, that this United States for the eagles would be life ongoing.

LUTHER BURBANK: With produce, with crops, you can see here, the difference in this can you not? This is one picture of the produce of foreign nations and the produce of the United States. Thus you would see that this agriculture comes from the land! This abundant crop comes from the Bible in that these people life

in honor and truth. And thus the land produces that which according to cosmic law is the and overflowing with milk and honey, even past the 100 years at present.

George Washington: This is also of the National Standard. Do not accept produce from elsewhere when you are the Chosen People.

Before Luther Burbank	After Luther Burbank.
	 California Burbank Rose
 Potatoes of the Irish famine	 Russet Potato
	 Spineless Cactus. Edible for animals.
