

US National Standard in Culture

Harry Luce of *Times*

Work Ethic

Seasoned Colonialists: In the work ethic of the Soviet Union, these people are ones living under the reincarnated Assyrian gods. And these will not produce as this is totalitarianism. They cannot but do the opposite of whatever is asked of them to do, irrespective of the law, rule or mandate, coming from the Communist Party. And this was also the work of Rasputin and the Tsar Nicholas before the Communist Revolution.

In the work ethic of China, you have a great backdirect associated with work. Then you have the group masturbation sex to bury any individuality or creativity that they work as bees in a bee colony. You call it, ant colony.

In the work ethic of India, these are not able to move forward, although the British were there to show them a higher way through common law. Instead, they asserted their caste system over what the British could have given them, a freedom to work.

MOSES: When the West leaves, they revert back to their previous work-ethic. What work however they have from the West is short-lived.

Seasoned Colonialists: Now you see that the only work ethic is God centered. It is being productive to bring forth your talent. And to perfect yourself as a Ray of Light and its primogeniture.

Harry Luce: I was a Calvinist at that time trying to raise the standard in the United States from the blue collar worker to the university scholar. Over time, however, you see that this work-ethic is then morphed into another form of the God-seeking way.

Bill Paley: Even as the Jewish people do not stay at simply multiplying their wealth. They are moving on, they are understanding Genesis in a higher way. They are also understanding that what they see before them is not actually Jesus Christ (which they are taught not to accept) but of Martin Luther's work in working for grace and truth.

MOTHER MARY: The Jewish people work to understand love.

Harry Luce: Thus this is true, that New York City served to bring about that truth in media whether in TV or newsprint or magazine. It is where the book publishing industry is primarily. And you see that people move there to write.

MOSES: The National Standard is made in New York, it is where the nation goes where the culture of New York stays high, it is furthered throughout the nation thereby. And there the Jewish cultural heritage of their work is to contribute to the work of the United States whether in banking, real estate or jewels.

Seasoned Colonialists: It is said, that business does not consider culture, and now you see that it is culture that determines business failure or success, whether the United States will be a third world nation or not.

MOSES: In no wise, can the United States become partners with Mexico, with Germany for their Islamic merger, with

Red China. Whether in GATT or NAFTA. You can discard all these agreements, Bretton Woods and Yalta Conference Agreement as you see the work ethic is not shared. Not even partners with Israel, as they are fascists. You see how Poland itself who loves the Divine Mother in Mother Mary, could not do aught else except rebel under the Soviet boot as they could not find their way without the Christian work ethic that they knew themselves to be.

Martin Luther: It is not the Jewish work ethic but the Christian work ethic that this nation would come under as you see that the classes themselves whether of the feudal states of the lower peasant classes in Europe or the blue collar workers in the United States are encouraged by grace and truth at the workplace. Every kindness shown as the Lutherans are taught to do, the ones at Salvation Army, they are then able to uplift not only the worker in self-esteem but in all ways, such as, sharing in brotherhood at Alcoholics Anonymous, and also in the economy in general.

MOSES: This is the Eagle culture. The work-ethic cannot be devoid of its culture.

Seasoned Colonialists: The work ethic that is there is not what is conducive to bringing a savior nation, nor is it one that will make the nation innovative and of a giving of the largess of heart to see to bringing a relief to suffering at every point of work ethics and to expand work creativity.

Harry Luce: Making shoes here and making shoes elsewhere is not the same work done here. And if the making of shoes is a precursor to making another more magnificent creation, this must be on our soil.

Percentage of Foreign Ownership of Specific U.S. Industries

- ▶ Sound-recording industries 97%
- ▶ Commodity contracts dealing and brokerage 79%
- ▶ Motion picture and sound-recording industries 75%
- ▶ Metal ore mining 65%
- ▶ Motion picture and video industries 64%
- ▶ Wineries and distilleries 64%
- ▶ Database, directory, and other publishers 63%
- ▶ Book publishers 63%
- ▶ Cement, concrete, lime, and gypsum products 62%
- ▶ Engine, turbine, and power transmission equipment 57%
- ▶ Rubber products 53%
- ▶ Nonmetallic mineral product manufacturing 53%
- ▶ Plastics and rubber products manufacturing 52%
- ▶ Plastics products 51%
- ▶ Other insurance-related activities 51%
- ▶ Boiler, tank, and shipping containers 50%
- ▶ Glass and glass products 48%
- ▶ Coal mining 48%
- ▶ Sugar and confectionery products 48%
- ▶ Nonmetallic mineral mining and quarrying 47%
- ▶ Advertising and related services 41%
- ▶ Pharmaceutical and medicine 40%
- ▶ Clay, refractory, and other nonmetallic mineral products 40%
- ▶ Securities brokerage 38%
- ▶ Other general-purpose machinery 37%
- ▶ Audio and video equipment manufacturing and reproducing magnetic and optical media 36%
- ▶ Support activities for mining 36%
- ▶ Soap, cleaning compound, and toilet preparation 32%

Foreign Ownership of U.S. Industries (continued)

- ▶ Chemical manufacturing 30%
- ▶ Industrial machinery 30%
- ▶ Securities, commodity contracts, and other financial investments and related activities 30%
- ▶ Other food 29%
- ▶ Motor vehicles and parts 29%
- ▶ Machinery manufacturing 28%
- ▶ Other electrical equipment and components 28%
- ▶ Securities and commodity exchanges and other financial investment activities 27%
- ▶ Architectural, engineering, and related services 26%
- ▶ Credit card issuing and other consumer credit 26%
- ▶ Petroleum refineries (including integrated) 25%
- ▶ Navigational, measuring, electromedical, and control instruments 25%
- ▶ Petroleum and coal products manufacturing 25%
- ▶ Transportation equipment manufacturing 25%
- ▶ Commercial and service industry machinery 25%
- ▶ Basic chemicals 24%
- ▶ Investment banking and securities dealing 24%
- ▶ Semiconductor and other electronic components 23%
- ▶ Paint, coatings, and adhesives 22%
- ▶ Printing and related support activities 21%
- ▶ Chemical product and preparation 20%
- ▶ Iron, steel mills, and steel products 20%
- ▶ Agriculture, construction, and mining machinery 20%
- ▶ Publishing industries 20%
- ▶ Medical equipment and supplies 20%
