

# US National Standard in Culture

Harry Luce of *Times*

## Work Ethic

**MOSES:** What you see about the third world nation time and time again in the work ethic is that someone has power over another. In feudalism this was so— in the Soviet Union, in Red China and Japan by the family hierarchy, in Mexico with the machismo and family mafioso, in Italian mafioso, in Islam with the religious caliphs as overlord, and in Africa of the tribal lords.

The United States does not have this, other than the “sergeant” mentality that brooks no reason. He will beat you at his whimsical beatings, and you are similarly punished by arbitrary lawmakers of the legislatures.

The United States does not actually have what is this “power over another person” that is seen in the religious orders, in the static institutions where there is the guard mentality. The guard mentality has been shown in the Stanford Prison Experiments where the students went to actual prisons and found themselves ill treating the prisoners only as they were the guards and had a power over the inmates. This guard mentality is found especially in the Soviet Union and wherever Communist parties are.

**Seasoned Colonialists:** The United States actually does not have this. What they have are titles and positions higher and lower in an organization. However what they must realize is that the workers are in a similar condition when

they are not allowed in the corporation to do research and to work on innovation.

At the point that the worker is not seen as in the auto industry, this is where they are not able to express their God given talent, they will rebel as they are treated as a thing.

The sergeant in organizations exacts an obedience that is illogical and is damaging to the soul spirit. Whereas the obedience to God's Will is an obedience nevertheless that you will enact the highest ethical code working for a corporation with its dress rules and rules on how to type correspondence which requires you to obey.

**MOSES:** What we say then is that you understand what this work ethic entails. It is not only a matter of stating having a Christian work ethic but it is that there is not the abuse of power through the tsar connivances or guard mentality. Thus you know that Rasputin had cavorted with the Russian court, and this culture must not be present in corporations, that the women are required to obey as being sex objects such as you have in Japan. Even Japan, bolstered by the United States trade, and for not having any military spending, once the United States leaves, will descend to its own level for its work-ethic.

**MOTHER MARY:** This is so for the closing permanently the borders to Mexico at the South, as they will need to immigrate to a country Christian that is not either the United States or Great Britain as their backwardness is too great, the United States cannot ever "absorb" them.

**Seasoned Colonialists:** Realistically and practically for a nation such as Mexico to be as the United States would take 5 generations, and that is without having the newer generations to continue to act out their barbarianism such as their American pyramid temple. This is already seen in

India. The British were there already for these long years, then they themselves are able to convert to the Christian work ethic as 5 generations have passed by.

**MOSES:** Nevertheless the rule is that there will be no immigrants to the United States unless it is for documented religious persecution.

**Harry Luce:** You can see why it was that *Time* and *Look* magazine was so important to me as a vehicle for propaganda as I had said. Culture was to be shown that people would see weekly or monthly what is the high regard for culture that the middle class would grow, that the nation be filled with freedom worshiping workers who did not feel the heavy burden of the monarchs of Europe, that they were continually taught to live their life out as serfs and living in serfdom. And although New York City was crowded and seemingly endlessly with people, it was a place that people lived in this freedom, in harmony when they are God taught.

**NOSTREDAME:**

- 1. You can add under the Colonialism section of the United States Constitution: Christian work-ethic without guard-persecuting mentality.**
- 2. You can add: Communication to Military Law Council and Kings by anti-necromancy proof system.**
