## Moses on Work Ethic

## Threefold Flame 4

Threefold Flame of the Heart

**MOSES:** The three flames seen entwined in this photo, is upon the law of ethics of morality such as the Ten Commandments, and able to command a geometric spiral that it begins to spin as a top and is able to throw off what is unlike itself.

The Threefold Flame is capable in the work-arena able to build those magnificent forms geometric of the threefold Light that is capable of fantastic creations.

Therefore while the basis is the Ten Commandments for the culture of the United States, it is hoped that the United States would build from this triad Light—the conflagration of geometry, as the United States is an Atom.

The Atom is what the Military Law Council would protect, and from this protected land in culture, morals, education, and militarily, and the United States be placed in an economic pyramid, free of monopoly at the lower level of the pyramid, is then able to spin off geometrically from this employing of the Threefold Light.

**GOD SUYRA:** It is possible to have a golden age in the United States.

**MOSES:** That is why the Military Law Council are those who understand the Atom intrinsically . They understand geometrically the economic pyramid both as the economy and as socially that this is the economic pyramid of the United States. They understand the push of Judge Wendell Holmes and Harry Luce, Jarvis Raymond and Bill Paley, to push through support of the middle class. This is the middle class of the pyramid, it is the Judeo-Christian heritage of the Bible which I wrote, remains intact as the way of life as foundation, that does not end only with the

Bible, but goes into geometric forms that are seen in the Atom to blossom if you will for no other reason than the math becomes geometric, life is geometrized, and is not one of addition, that there is an eye for an eye, a tooth for a tooth, but through the management of the Threefold Flame, that there burst into a flame, that is seen at times a laser of Light, other times as a conflagration of Light, a torch at times to lead the way for man.

This would be no different than the word of Harry Luce, Bill Paley, Jarvis Raymond in the magnificent work in creating the National Standard in media, newspaper writing. The news reporters in New York City have been a part of an interconnectedness to the police stations that they are right outside so that the news reporters step outside, go nearby to find news from the police.

**MOTHER MARY:** It is possible to have a golden age. You would need to shut out all foreign people who do not have the British level of either common law or for their having carried the lineage of Christ through the throne of England.

**NOSTREDAME:** Even the throne of France although they had the fleur de lis, the image of the Threefold Flame did not

have the idea of the Atom which was seen by Democritus of Greece of old. It is as if it is the Archimedes lever that is seen here by the cultivation of the faith, hope and charity that is of the Threefold Flame in the work ethic in the United States into all areas of work whether in transportation or building highways.

**MOSES:** Judge Holmes likewise saw the law as syllogisms running parallel to divine law. Thus you see, he too understood common sense and common law that is put into an economic and social pyramid— to support the middle class in practicality, that is, as said, one that follows the Judeo-Christian religion. It is only the beginning however. It is through the igniting of the Threefold Flame.

**GOD SUYRA:** Through the spinning top action of this Threefold Flame, it becomes as a torch, to light destiny's path.

**MOSES:** The higher must go higher and the lower must go lower. The laws must be based on developing the geometrizing of the Light of the Threefold Flame in the heart.

**NOSTREDAME:** It is the Archimedes lever.
