Hallucinate Drugs

JARVIS RAYMOND: Once embarking on drugs, more truth seeking shuts down, your mind becomes less expansive. You think less and less, you know less.

What is this process? It is that there are *demons* of marijuana-deathdrug that taunt you to take more and more of the drug. Unless you are cognizant of *demons*, you think this is your own mind thinking and not the taunting of demons. This is the purpose of the drug demons, to latch on to the spinal column, to suck out your light rising up the spinal cord from the base-of-the-spine chakra.

ANDREA SELESTOW: Another word you would want to learn is *necromancy*. However just knowing the word is not enough though.

You try the spirits as Jesus Christ taught us.

How is it possible that one day you think highly of someone with integrity and the next day, you think that he is a square for example. Is it possible that you really think in this manner now?

Sometimes this is all it takes for someone never to again smoke marijuana-deathdrug, as they feel they are being tricked or lied to.

JARVIS RAYMOND: They are lied to for the demon's to drain out their brain and energy after the high.

ANDREA SELESTOW: The high is not real. Love is not warm-and-fuzzy, this is not love. Love is enduring truth if it is true love. So feeling *high* is not the enduring essence, and you would leave off of it. Love has integrity, it is not a sensation called warm-and-fuzzy.

JARVIS RAYMOND: It is a lie.

MOSES: I would add killing and sadism to that "high."

"All hallucinate drugs are poison."
