

Reality Check

Low Prices

The comment someone made on this picture was "That's me. I am always called upon to help people and I sacrifice to make it comfortable for someone else."

HOLY JUSTINIUS: It is a picture of how Red China sees you. Making you a Hong Kong colony.

VIEWS OF CHINA

SAINT DIANE: Americans are a kind and generous people.

ANDREA of Chicago: You can see how it is, that Americans became traitors for their \$9 million Swiss bank account. They

willingly helped with the NAFTA plan and the Clinton's "grease the wheel" plan to make the United States a Hong Kong colony if other Americans can benefit from low prices in theory **until the numbers start coming in!**

- **Tens of millions of castrations of Red China.**
- **People mostly seniors of 48,000 people killed in Silicon Valley alone, by Red Guard.**

GOD HELIOS: Essentially the war with Red China is a war with low prices.

MOTHER MARY: These are **counterfeit low prices**, they do not exist. They are below their cost of production to make the \$5 shoes. And they feel they own you the same as the owned Hong Kong. They will wait the 100 years the same as Hong Kong to take over the United States for your silly thinking that these low prices are in honor of your NAFTA trading with them.

GOD HELIOS: You do not yet understand it is not only Red China, anyone who offers you low prices can take away your land, your jobs, your currency, your nation. Even take you away as a slaving colony to them.

SAINT DIANE: The low prices are what you are at war with. However it is **"foreign" low prices not low prices.**

ANDREA of Chicago: **We have low prices now!** You can go to the thrift store and purchase at 70% off!

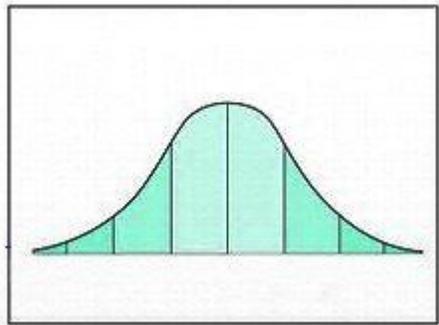

Nancy of Oregon: **You can have low prices** with heart attacks being administered by homeopathic medicine for 4 cents of Belladonna.

You can have a \$10,000 and not a \$60,000 car if Congress would back off with their regulations, and give people a \$10,000 car!!

You can have low prices if gasoline was at its real price of 65 cents a gallon and not \$3 a gallon. Its up to the people what they will tolerate about the world oil price!

MOTHER MARY: **You can have low prices** if you would have the children marry and move in with the family and have an agreement that there is no abuse of the woman and children.

You can have low prices if people would open up their hearts and to put in meaningful legislation that determines prices to operate on a bell curve!

MOSHE: It is what I taught the Egyptian slaves. **You say, "You are cruel and sadistic. Get out of my face!" And you do not let them near you!**

Typist: This is your vision of the United States. There is graffiti everywhere. It is a hellish world where you just accept the next and next hellish killer in your neighborhood and do not mind anything as long as you have your low prices.

The man who shot the schoolchildren was shooting at airplanes many months before. Nobody reported him to the police.

LORD SHIVA: It is not necessary to belabor the hellish circumstances that you live under. However we would say that you do not want cannibals here in the United States.

HOLY JUSTINIUS: You do not want a single cannibal here! Absolutely make this determination!

LORD SHIVA: You want them out. And you will create your own low prices. If they think they can just saunter over here and kill 48,000 Americans in Silicon Valley alone and just get away with it. they're wrong. We are about holy communion.
You must kill the killers!
You must enact your own low prices!
