FATHER MALACHI: The Presence of Mother Mary in education is such an angel in government.

CREATURES' WORK IN WORLD GOVERNMENT 123

ANGELS HAVE BEEN BADLY TREATED by the men of our time. Where they have been given any consideration at all, they have been locked off in a separate compartment somewhere apart from the world of reality in order that men might the more easily forget about them and concentrate on the physical and tangible. But then the soul of man has received hardly less cavalier treatment, and for the same reason. In both cases, men have failed to remember that the angels are an integral part of the natural order; they cannot be excluded from that order without distorting the whole picture of nature. As natural, the angels have a part in the government of the universe that cannot be confined to the angelic world. In fact, by virtue of the universal law that decrees the superior's help to the inferior, the angels should have more to do in the government of the universe than any other creature in the world.
