

Dr. Andre Saine,

The question I believe you are asking about healing with the compass plant (“true North principles”) is “Is this grafting?” “Is this herb prescribing?” “Is this signatures?”  
No.

First, Mother Mary taught about the holographic universe. And I can include the first chapter on this. What it is saying is that each small part contains the whole kingdom.

The best case to describe this is in her healing of the military who had been syringed by Red China, German, Canadian doctors. What they do is to say to the military, get a dental appointment. They put the person under anesthesia. The doctors take a long syringe and poison a part of the brain that has been identified to make them lose their long-term memory.

What Mother Mary said was, “I only need 2% of the brain working.”

And she prescribed Belladonna hourly for a while then daily and weekly and the brain was restored in all these cases.

Now this is not the liver to regenerate itself, instead this is brain tissue. So I can only ascribe this to the holographic universe.

As far as the grafting, that woman was to take a verb prescription for 9 years. It has the effect of grafting. But Mother Mary’s time horizon is very long. I will say this. You see how you have done so well with psychiatric patients. And you saw them healed in 10 years. And what she has said to me in cases is that it is actually 50 years, not 10 years, that the psychiatric cases are healed. And I am more the amateur as what takes 50 years takes 50 years.

Another thing. Dr. Burnjeh has taught me on homeopathy. And we notice the symptom of Sepia where the little fish stays still while the big fish passes on. His commentary on this is not what you read in materia medica. What he is doing is to see what is in the mind of someone. So for example, you will recall the analysis by Father Malachi on bull-lancer demon. And the motive is different than jihad demon. So what the doctor is doing is looking at history and seeing how this criminality works.

**BURNJEH, Physician:** Thuja and Sepia I have shown her are criminal remedies.

**Typist:** The use of the compass plant came from Dr. Nostredame. He said my prescription of Nitric Acid for drug use was not as close, generally. The 9-year prescription

for that woman was that she was aggravating and irritating, so I did prescribe Nitric Acid. However Mother Mary is not saying that this is the prescription, as she is not the prescriber, I prescribed for her as I knew the woman.

**Typist:** You ask, “How do you use Thuja then?”

The verb is seen in the consultation. If you whip the back enough times as in Islamic whipping, it will cause cancer. So you give Thuja for the cancer.

**BURNJEH, Physician:** It can be the repeated injury to the skin as in skin cancer. The skin is how they lie as a husband. They cheat on the wife. They may go to pornographic movie houses.

You address the cancer as a serious condition that they must change. Or else. But it is based on the lying that the one does.

**Typist:** You ask, “How do you use Sepia then?”

The example I have is something you can form an aphorism over. I can only describe the case. The woman is a witch. She wears the black eyes and celebrates the witch’s holidays. She is a prostitute. She would like to train her children to be prostitutes.

This is a case where she rides the broom as the witches do. And her children do not necessarily have to be hexed by her. She is the small fish waiting for the big fish to go by. She waits to see if the children will adopt her stance and to believe her.

One child does. He believes in celebrating the witches’ holidays with her. The other children do not believe in the witches’ broom. The prescription would be to scold her to say, you are waiting for them to accept life as the witches broom that is the power of the kingdom. Unless you give it up, this disease will not go away.

**BURNJEH, Physician:** It is more to this type of prescribing. However, you see that much of the verb prescription is to give forth truth. It is not enough to heal a symptom, but to confront the criminality.

**Typist:** “How do you use the work of the old homeopaths in function prescribing then? It does not show that this is what Hahnemann did?”

Mother Mary said that Boenninghausen did use function prescribing. What she may mean is that he would look at the organ that was needing a verb.

**BURNJEH, Physician:** What was it doing that was a disorder.

**Typist:** The example that comes to mind is her remedy for infertility. It is Lac Humana. The infertility may be due to scraping of the uterus from killabortion. It may be from hatred of some kind. And the medicine is mother's milk. The human kindness. It is invoking of the vital force in this way toward a sense of relief at being around the energy of mother.
