

Dr. Andre Saine,

Typist: I am enclosing a few pages of Boger. Just go to the yellow highlights. He on the last page says that keynotes are pernicious practice, so not all of this can be used. Other than that, read what he says though.

He says that the remedies have a course and life just as diseases do.

He furthermore says what are you looking for in the patient? He says, you are seeing the life of the medicine moving in the patient. Is this not a looking for a verb in function prescribing of some sort?

BURNJEH, Physician: This is not taught in any of the schools. The failure rate of the students under the Kentian-Vithoukaskas method is 100%.

MOTHER MARY: If Boger could arrive at this understanding and he knew conventional medicine, see if this can be developed in the students that they are as scientists looking and looking. As the Kent-Vithoukaskas method is highly speculative.

BURNJEH, Physician: The Panos and Blackie method seems mysterious by comparison. *It need not be!*

Typist: What gives the *Science of Homeopathy* book a great usage is the Alvergadro number but it does not explain why the medicines are potentized.

MOTHER MARY: The medicines are potentized, for the pounding of the medicine throws with energy the holographic image onto the water.

BURNJEH, Physician: Thus what you see is that the *Science of Homeopathy* is limited by current scientific understandings, and as you learn from the Archangels a higher science, you would see that this knowledge was flat earth medicine.

MOTHER MARY: It is quite disputed on Wikipedia, as the *Science of Homeopathy* writers did not understand.

Typist: The question you had was: What of the science of Hahnemann is to be used then? The one law that distinguishes Moshe and Nostradamus as the doctor is backdirect.

I remember Edgar Cayce, the writer of karma and reincarnation took a medical reading. The man had stomach pains. The reading said, he was stabbed in the stomach there and that is the reason for the chronic pain. So am I a scientist? I look at all my cases with this backdirect in mind first.

BURNJEH, Physician: Karma and reincarnation was taken out of the Bible at the Nicea Council of bishops. In this medical case, he may have given him a broth but the *understanding of past life wrong* was what helped to remove the severe stomach pains.

Typist: He was made accountable for the killing he did, that he was knifed himself in the stomach.

MOTHER MARY: You are looking at etiology in a vastly different horizon.

NOSTREDAME: I do recommend that you read the Dolores Cannon books. As you will gain a greater understanding of science as this is your question.
