

THE NEW US CONSTITUTION

March 2018

West Aptos

The nature spirits speak the truth. So they are actually the opposite of the spy novels where everyone in DC is a crook and lying.

LUTHER BURBANK: You learn to not trust anyone reading these spy novels. You yourself have seen this among the Shakers, the Pilgrims, the Quakers, that they speak truthfully!

MOTHER MARY: Even the Christians from Mt. Aptos! They have no need for the liars when they know nature!

COMMENTARY: We have shown to you the farmers to be ones who have the horse sense. It is more however, they must be of the monastery.

Typist: The Military Law Council has to keep the morals of a nation. The law has been primarily legislative code law. When Napoleon came to power, he said there will be no tolls. This is the power that is lacking in law. Common sense says no one should have to wait and pay to cross a bridge. Law is about

making legislative or code law to fit someone's need and not this, the general support and upkeep of the Middle Class.

Nostredame has noted that the religious monasteries have weathered political groups coming and going. Mother Mary pointed out that Mt. Aptos has survived 2,000 years still doing the liturgy of Christ from 2,000 years ago.

COMMENTARY: There needs to be a valley carved out for farmers to move from the Quakers, Pilgrims, Shakers, Mennonites, even Alcoholic Anonymous and Salvation Army that they have their farms in the valley. A panel of judges arises from the monasteries that are governed by the 24/7 vigil rules and the altar attendance rules to have a flame on the altar. The panel of judges would have 30 years of legal training although not initially.

They will be housed in a building with an underground shelter. All law arises from them. They send out the lawsuits from here. For example, if they hear that 5 teens were killed by a marijuana deathdrug smoker, they will send the lawsuit either to the deputy or the courts there and to say for that county: marijuana deathdrug smokers are shot to death without trial within that county. If there is one of this type, there are others to lay siege to that community and in public places.

They themselves use their horse-sense in all areas whether it is transportation, energy, water or such. Their role is to send these lawsuits out to the Deputy, military mayor who must enforce the law-and-order where a city abides both in the US Constitution and the Main Code.

The Kings and Queens keep the details of the common law code lawsuits. The 2,000 page Main Code book is updated and given to the military mayors to enforce, and have the military to back them if needed.

The water is watched over by a military official who is not set by State boundary lines. He will bring to justice to the West Aptos panel of judges what must happen in. It will be in all these areas of water, transportation, education, TV media.

Typist: Alcoholics Anonymous can have a monastery there, praying for the alcoholics but they must abide by the 24/7 rules, keeping a flame on the altar rules, no different than the other monasteries. The Churches who can have a monastery there are only righteous, the Mormons cannot go there and begin a monastery. The Churches will be of the same ones originally out of England which will include France Huguenots, the Spanish padres, and the Jews from all over the US. It will not include Mexican Catholics as they have been an affront to Mother Mary to illegally quarter in our homes and carry the slogan “kill as many Americans as possible.”

MOTHER MARY: Mt. Aptos is 2,000 years old. These monasteries must have the many thousand year history themselves.

Typist: The 8-hour confessions that Martin Luther did is how you see this is the foundation of the nation. He is speaking the truth thereafter. This is the training of the monastery.

MOTHER MARY: They keep the 24/7 vigils. They have Vespers, they have the 3 a.m. vigils, they have the chants of the Holy Word, they tend to a flame on the altar and not let it go out.

COMMENTARY: It is not a place for the administrative offices of the churches. It is only for those who live a monastic life. Trolleys will be made that they are transported to the farms in the valley when not in session. The community can be carved out in the Allegheny Mountains or be outside but having an underground shelter. Another example of a lawsuit they would send out is how the chemical companies sell chemicals to the enemy nations to poison the Great Lakes. They would send out a lawsuit to raze the foreign chemical company or to shut down the US company. There are no further “wars” under this scenario for someone to vote to whether we go to war. They will see what are trouble spots and send out the lawsuits to the

Military Law Council and Kings and they see to giving the military support needed to overcome such evil.

Typist: The appointments are lifetime appointments in a loosely defined way. Their families live on the farms and the monasteries. They study law for at least 30 years. They look for criminality to draft the lawsuits. They look at the 11th hour laws after looking at a case. Thus they can have an entire penitentiary go to the electric chair as they know hardened criminals come back out to kill and rape.

MOTHER MARY: Only such a panel of judges can see this through. They can see through exiling the mentally retarded, those who refuse to work. They have this understanding of what it must be to have a free nation, that military force must be used to enforce having a free nation and not as before, using the military against a free people to make of them slaves to the conglomerates.

COMMENTARY: They must set the standards on the drugs. 2 times an amphetamine and the electric chair.

Typist: The original Constitution was to favor the corn laws and landowners in economic achievement, how to get the government to support your business. The panel of judges are looking to see that religious freedom is upheld in issues of conscience, so that free speech is understood as a right of Red China to rally around the Federal Reserve building on Walmart justice. These are paid as most Eagles are busy at work and have no say, yet they themselves know this is not good for their country.

Valor White: The entire Detroit union workers laws and carmaker laws foisted upon them by Congress will have to be redone.

Typist: The banks need to serve the people, file wills for the old people. The banks would not sell people sleazy sub-prime loans.

J. Paul Getty: The banks have to come under common sense rulings. And not make risky loans and not have the loans be for the best payers only where they pay the lowest interest rates, always making these wealthy the more wealthy.

Valor White: All shaving of the coin of the realm which the nations did on the US currency they would stop.

Typist: What Valor White who was a chief of the SEC did was, take my word that the coin the realm was being shaved. Over the next few hours, he did calculations over Treasury numbers, ran tests on the numbers and a half day later said, “For the amount of cheap shoes coming into this country, there is not a possibility that the currency debt is this but that the Treasury computers have been rigged to give more money on to the side of the ledger of Red China and the G20 nations, especially Canada.”

COMMENTARY: Often there is a reason for laws. Capital punishment laws. The idea is to get people to be sympathetic to criminals, “poor impoverished” and they in back door don’t-tell methods continue their business as the police are tied up.

Typist: And the laws would be powerful enough to stop referendums that are immoral.

COMMENTARY: West Alps is quite different. There, it is a law court. There is no law court here at West Aptos. They only send out the lawsuits and it is for them to go back to their monastery duties and farming duties.

Typist: The laws are different than the cities. If they find a traitor among them from Red China, they should shoot the traitor themselves.

COMMENTARY: It is a closed panel of judges, only those they know can be on the panel. Furthermore, not all the monasteries might be even invited to joining them.
