

Stretching the Homeopathic Medicines

The medicine come in pills in a bottle. You put one pill into the dropper bottle. You fill the dropper bottle with pure water and put a few drops of pure alcohol to preserve the water and medicine. You would have only used up one pill in each bottle and you have the rest of the medicine bottle left over. Neither the medicine bottle or dropper bottle require refrigeration.

MOTHER MARY: The medicine can go on for perpetuity if you would understand that you leave a few drops of liquid with medicine in the bottle and then fill it with water and shake it vigorously by pounding the medicine of a book or surface for

30 times for a 30c or
100 times for a 100c,
1000 times for a 1M,
10,000 times for a 10M.
