

Ascended Masters

At one time there had been a Ritual of Exorcism Project. It was a means to place a curse on others. Many of the participants had the demon "Crane." It is an opportunistic bird in feeding. These people seek to find situations that are to their advantage that they look for their feed. They do not come to the Archangel Michael Assignment as it is not in their mind an opportunity to advance in worldly standards of power and ambition.

Why did they come to the Church Universal and Triumphant, what did find here, why have many of these left the teachings? It is that they had been seeking the title of minister, mantle-of-Messenger absent discipleship and for a direct sponsorship, to be director, manager and so on. They seek the power that titles bring. Once they do not find that this is being conferred any longer, they go elsewhere. When El Morya says, we will no longer have ministers but we will have no-name decree leaders and generic religions, they go elsewhere. They are the Machiavellian power seekers. They look to see who is getting ahead. They seek to apply the principles of Machiavelli that you will do charity not for charity's sake but that it might be a gain to oneself.

It is the same mission as the: we are of publishers of 50-years. They do not keep the names of the community sangha current in the database. To them, if the church members are not paying customers, they do not have association with them. The giving out of titles of messenger this and that or Hyksos or naming ones house Morya House is seeking the power by association.

Why did they come to the Ritual of Exorcism Project? What they were looking for was an opportunity to stand on the altar and be as a chosen and called out Messenger.

This example is for illustrative purposes, it could have been anyone. The Messenger gave someone a redesigned photo who is seen standing on the altar. Messenger. Yes, Messenger. Why would anyone who says they worship the Messenger not replace their photo representing the power of the Ritual of Exorcism Project when she specifically asks this be done? They think in terms of now and what gain they will have. They are not looking at how she would feel. They do not say, "Oh this will make the Messenger happy if I do this." They will ask, "What do I gain from this?" They will put the Messenger under the bus, so to speak, not consider what feelings she might have.

The Messenger may say to them, "Come into alignment! I demand it of you, this is I speaking." These are not words on a paper however. They carry the fire, the Messenger is standing there, El Morya is standing there. Mother Mary is standing there. They do nothing. On the contrary, they listen to the demon that say, "What will you gain?"

You have asked of this example, why would anyone lose their staff job over switching out a photo? It is the same one only it has a different background. The old one has the altar and the new one is a pink background that even enhances the photo, the colors are obviously more vibrant. Why?

The demon in control seeks to stand ground that it has control. It will not leave off the gain it has made thus far. There are black magicians in the photo that El Morya has wanted to shield the eyes of his chelas from seeing. This is the demon face-to-face with El Morya. It is a territory issue of having gaining ground over El Morya that the demon will not give up territory it has thus far gained through the Ritual of Exorcism Project.

These seek association with those who have power. They desire to be close to the Messenger not that they might be chastised and pummeled in the ego but to enhance the ego and thought wise among men. When they are chastised, they look for another opportunity elsewhere as they are not looking to be chastised, they are looking for opportunity to enhance the ego. Now you see why it is that the Messenger was often found delivering the fire as these would leave the

teachings on that account. Now you see why it was such an issue for those that the Messenger would do this when it was an Ascended Master delivering the fire that they would pin the Messenger as the opportunistic, ambitious one when it was they who had these demons.

How are you to recognize this demon? You only need to see where you might have not passed your daily tests of obedience. For therein lies your answer. Should you obey unconditionally, you will have been claimed by the Guru. If you have looked at each "injunction from El Morya" to be picking and choosing what you will do, the demon claims you.

The power sought is not only of worldly power, it can be psychic power. Seeking a position in the false hierarchy is a temptation that will happen when one is not willing and ready to take on the karmic burden one is born with that continues throughout life.

One can see this in the temptation of Jesus by Satan. He promised Jesus life would be easy if you will serve me. This was not so much as becoming his servant as it was a partnership, a messengership, being prophet to the false hierarchy and bringing about their kingdom on earth. Jesus overcame the temptation and willingly carried his cross.

The crane demon comes to tempt as much as does a Satan, fallen angel or fallen ascended master. It is worthwhile to note that some carry this temptation through many embodiedments and it does not appear in one only. This is perhaps why Jesus gave the teaching, For it to be scripture learned early in life to embody this teaching as fundamental throughout ones life, that one does not betray Christ and build his Church on worldly or psychic power but on the rock of Christ.
