

## Ascended Masters

The demon "Pinniped" is as the seal. In history at one time, Chinese women had their feet bound so that they would have limited locomotion. One with this demon is one who knows only limitation and follows after its master.

Pinnipeds are known as seals. Pinnipeds (from Latin pinna, "feather" or "wing," and pedis, "foot," meaning "winged feet" or "fin-feet") are large aquatic (mostly marine) mammals having both front and hind limbs in the form of flippers. They have streamlined bodies and four limbs that are modified into flippers. Though not as fast in the water as dolphins, seals are more flexible and agile. They use their front or hind limbs primarily to propel themselves through the water. The otariids and walruses have hind limbs that can be pulled under the body and used as legs on land. In comparison, terrestrial locomotion is more cumbersome. Quite commonly, seals will be chosen to be kept in captivity and trained to perform tricks and tasks. Once relentlessly hunted by commercial industries for their products, seals are now protected by international law.

These are then easy prey to those who would captivate them to do their work. These are as the mammals. They can give birth and be as women who are to ensure the continuation of the family or race. They are not seen but for procreation and utility, not with a mind that debates in seeking Truth.

**He may even have wisdom but he cannot convey that in the other two plumes for a Christ action. He can talk but it is without proof of action as in the Good Samaritan. He can let others perform the work while he sits back in life and watches others as life seems too arduous when one cannot move but a few inches on ones hind feet or demon limitation. This is the constant worry, that I am too slow, I cannot move that fast, so let others do the work.**

**Christ Church does not move forward with this demon. He does not identify with the Christ mission and this demon is antichrist. The demon makes one as handicapped, with ready excuse for non-action, non-Christ being, non-eternality. This they do for want of locomotion. They live in a dependence on the government, social welfare programs, the social group, the leader—or a voice—to tell them what to do.**
